GREEN PASTURES GARDENS

JULIUS ANTHON

2215 East 46th Street, Seattle, Wash.

Sends you greetings and many thanks for your part in the past good year! We wish to remind you that our small establishment sends out a new catalog only biennially. If you have destroyed or lost your copy we shall be glad to send you another.

In our cramped quarters growing space—"standing room"—is a burning question. We have never had compunctions about discarding inferior plants, nor even such as were a little lacking; only when "good" plants remain in the nursery for want of acquaintanceship are we disturbed. We have to hustle our plants into the world so soon as possible; we are therefore offering our new things at once though we have not many of each. Our most difficult-to-move plants have been put into pots.

CAMPANULACEAE

Adenophora nikoensis. A small Japanese plant with "style" and pride; stiff stems bear large pendent bells. 75c.
Campanula Elatines. Prostrate branches; leaves ivy-shaped, the whole smothered in violet-blue stars. 50c.
Phyteuma lobelioides. Grayish foliage; heads of bright blue. 75c.
Phyteuma orbiculare. Leaves round and scalloped; flowers blue. 75c.

CARYOPHYLLACEAE

Dianthus nitidus. The whole plant shining—dark green leaf and rich pink flower; buds black-purple. 50c.

CISTACEAE

✧ *Hudsonia ericoides*. The American beach heather; fine heather-like foliage; flowers bright yellow. \$1.00.

COMPOSITAE

Helichrysum frigidum. A tiny bush with tightly packed leaves of blue-gray; silvery-white everlasting flowers. \$1.00.
Helichrysum Selago. Stiff wiry branches; bright green scale-like closely appressed leaves. Flowers white. \$1.00.

ERICACEAE

Andromeda polifolia nana compacta. A Japanese high-mountain form of the bog rosemary; leaves pea-green above; gray-blue beneath; very floriferous, the flowers urn-shaped bells of warm pink. Small plants \$1.00.
Calluna vulgaris Foxii nana. One of the best of the small forms; rounded cushions of dark bright green; purple-heather flowers. 50c.
Erica hyelina. Will reach at least four feet; blooms in March; flowers inch-long tubes of coral color; may need a sheltered position. Small plants 75c.
Gaultheria Mipoueliana. An Asiatic species; branches inclined to be prostrate; handsome small dark green toothed leaves. Small plants \$1.00.
✧ *Gaultheria ovatifolia*. A fine ground cover; overlapping branches clothed in heart-shaped leathery dark green leaves. Fruit red. 50c.
✧ *Kalmiopsis Leachiana*. A beautiful small shrub lately discovered in a few isolated spots in southern Oregon; flowers *Kalmia*-like; pink. \$1.50.
Pernettya tasmanica. The least of the *pernettias*; perfectly prostrate; fruit large and greenish-white, ripening to rose-red. \$1.50.
****Rhododendron exquisetum*. Leaves blue-green and punctate with pellucid glands; flowers pale lavender. Small plants \$1.25.
-****Rhododendron occidentale*. Seedlings from our best pink form; throat splashed with yellow. 50c.
***Rhododendron pemakoense*. Our favorite rock garden rhododendron; branches upright and stoloniferous; foliage a good green and aromatic; flowers large, pink with the slightest washing of mauve. Small plants \$2.00.
*****Rhododendron racemosum*. Dwarf; very floriferous; flowers pink. Small plants 50c.
***Rhododendron sperabile*. To three feet; blooms when quite young; flowers scarlet with dark pouches nectaries; a very fine thing. Small plants \$1.50.
**Rhododendron virgatum*. To our notion very much underestimated; young branches rose color; leaves of good substance; exceedingly floriferous; flowers flushed white to vivid pink. Small plants 50c.

GENTIANACEAE

Gentiana cachemirica. A rosette of smooth gray leaves and large beautiful blue flowers. \$1.25.
Gentiana gracilipes. A central dark green rosette of narrow leaves gives off branched flowering shoots, each branch terminating in a large dark blue bell. 60c.
Gentiana kirishima. A Japanese gentian received from a connoisseur; each 75c.

PINACEAE

We have imported for propagating some of each of the fascinating "golf ball" cypress that originated in the W. H. Rogers Nurseries of Bassett, Southampton. These specimens are about two inches across, one-and-one-half inches tall. They are dwarfs that retain their character for all time. We can spare a few. \$2.00 each.
Chamaecyparis obtusa caespitosa.
Chamaecyparis obtusa juniperoides compacta.
Chamaecyparis obtusa tetragona minima.
Picea excelsa nana. A compact pyramidal small tree with stiff branches; dark leaves. Evergreens of that habit have special decorative value in the rock garden. Small plants \$1.00.

PRIMULACEAE

Primula cortusoides. An Asiatic woodlander; leaves somewhat puckered; flowers in heads; bright rose-crimson. 50c.

RANUNCULACEAE

Anemone nemorosa fl. pl. An exotic-looking form; white and lovely. 35c.
Anemone "Royal Blue." One of the finest blue wind flowers. 35c.
✧ *Aquilegia scopulorum*. Beautiful pale blue-gray foliage; large long-spurred flowers of coerulean blue. First prerequisite for cultivation is complete drainage; second, a lean soil to hold it to its essential daintiness. \$2.00.

SAXIFRAGACEAE

With the advent of "pot gardens" there is a renewed interest in saxifrages. We have imported some of the newer varieties. The plants are small but well-grown.
Saxifraga cochlearis minor. From the Encrusted Section; tiny, heavily encrusted leaves; loose sprays of large white flowers. An "easy doer." 50c.
From the Kabschia Section:
Saxifraga Cranbourne. Improved form of *Myra*. \$1.25.
Saxifraga Gloriana. Large pink flowers. \$1.00.
Saxifraga Valerie Keevil. Deep rose pink. \$1.00.
Saxifraga Arco-Valleyi. Shell pink. \$1.00.
From the *Oppositifolia* Section:
Saxifraga oppositifolia. Pritchard's var. more beautiful as to leaf and a more amenable plant than the type. \$1.00.

SCROPHULARIACEAE

✧ *Mimulus primuloides*. At home on the wet margins of rills and in damp meadows; large upturned clear yellow flowers on naked scapes. 50c.

THYMELIACEAE

Pimelea coarctica. A daphne-relation from New Zealand; procumbent branches set with small gray leaves of good substance; a mass of small white flowers followed by snow-white fruit. \$1.00.
